DETAILED ACTION

Priority

The priority to US 10/370804, 10/192416, 09/961738, 09/361544 and 60/094346 has been acknowledged.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 25 and 24 in part, drawn to compounds which are N-oxides of formula II classified in class 546, 514 and various subclasses.
- II. Claims 26-36, drawn to method of treating cytokine biosynthesis and viral diseases, classified in class 514 and various subclasses.
- III. Claims 37-44, drawn to compounds and pharmaceutical composition as given in formula I in claim 37, classified in various classes and subclasses. A further election of a single disclosed species for search purposes is required.
- IV. Claims 45-55, drawn to a method of treating using compounds of formula 1 as given in claim 37, classified in various classes and subclasses.
- V. Claims 56-61, drawn to compounds wherein R3 and r4 form a fused alky ring, classified in class 546 and various subclasses. A further election of a single disclosed species is required.
- VI. Claims 62-72, drawn to method of treating using the compounds as given by formula I of claim 56, classified in class 514 and subclasses.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, III and V are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are drawn to a compounds of a different core. Some are tricyclic and others are bicyclic and with other hetero rings.

Inventions II, IV and VI are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case these are method of using the compounds. Group IV is drawn to a method of using the compounds in group III and Group VI is drawn to using the compounds of group V.

There are numerous drugs available for the use of inducing cytokine biosynthesis and viral diseases.

Rejoinder:-

If the compounds are found to be allowable then the method of treating will be rejoined limited to the scope of the compounds.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 1625

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II or III or IV-VI, restriction for examination purposes as indicated is proper.

During a telephone conversation with Mr. Ersfeld on 5/20/04 a provisional election was made with traverse to prosecute the invention of Group I, claims 24 and 25.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Ersfeld on 5/20/2004.

The application has been amended as follows:

Cancel non elected claims 26-72.

Reasons for Allowance:-

The following is an examiner's statement of reasons for allowance:

The claims 24 and 25 are found to be allowable over the prior art of record.

Closest Art is WO 98/42712 does teach similar compounds but the date is after the applicants priority date. And also the disclosure is within a large genus, hence non-obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
